

## IQuEST Investigator Collaborations

Each of the IQuEST's four research programs reflects a key area of focus in determinants of health care quality, with each area informing IQuEST's research activities across the theme as a whole. IQuEST places a special emphasis on collaboration among our investigators across research programs as well as within the Texas Medical Center, with other HSR&D investigators, and researchers across the country at other VA Medical Centers and academic institutions. These collaborations as shown in the table below result in products that reflect multiple research perspectives and address multiple research goals.
